

# Le développement du compteur Linky

---

## **Bernard LASSUS**

*Chef de projet ENEDIS*

**Biographie :** Bernard Lassus is a graduated Engineer of "Ecole Centrale de Lille". He started his career within EDF group in the late 70's, in the Nuclear Engineering Field, in charge of Building, commissioning and operating nuclear power plants - EDF operates 58 nuclear power plant units in mainland France.

In 1997 he became Director of the Vitry Thermal Power Plant.

In 2004, he was appointed Director in charge of the mass market opening project - since July 2007, the French electricity market has been fully deregulated.

From 2007 to 2010, he was appointed Enedis (then called 'ERDF') Deputy General Manager, head of Human Resources and Communication. Then, in 2010, he joined EDF France as EDF VP in charge of Human Resources.

From 2014 to august 2018, Bernard Lassus was, within Enedis, Director of the LinkyTM Smart Metering Program.

Since September 2018 his main activity is focused on international smart metering projects (India, EU, middle East, ...).

He is President of the G3-PLC Alliance since 2014 - a non-profit association under French law, with more than 70 members from North America, Europe and Asia, established in 2011 in order to support, promote and implement G3-PLC in any smart grid application.

---

**Résumé :** LinkyTM Smart Metering Program is an AMM (Advanced Meter Management) program consisting of deploying 35 million smart meters by 2021 – more than 14 million are already installed. This programme is fully on track, on budget, on schedule and on quality.
