

Philippe NOVELLI

*Director Propulsion & Environment programmes
ONERA, former ICAO expert alternative fuels*

Graduated from Arts et Métiers and Sup'Aero high engineering school, Philippe Novelli joined ONERA in 1990.

He has successively worked in CFD for combustion, system design and analysis for innovative propulsion systems, alternative fuels, project management as well as research coordination and development of activities. He was project manager of the SWAFEA European study on alternative fuels and spent three years as responsible for alternative fuels at the Environment Directorate of ICAO.

Philippe Novelli is now Program Director for Aeronautic Propulsion and Environment at Onera, a position in which he is directly involved in research for understanding and reducing aviation environmental impact.
