## André BORD

*AAE*

A graduate of SupAero and Stanford, André Bord began his career in Nord-Aviation researching into hypersonic aerothermodynamics. He joined Aerospatiale as an engineer on Concorde, before leading subsonic preprojects. In 1981 he was appointed head engineer for the A320 at Airbus then joined ATR as technical director in 1989 before taking up a post as deputy technical director in charge of certification at Latécoère from 2002 to 2006. An AAE member, he chaired the working and editorial group of Dossier 53 on the Viability of electric urban transport aircraft, composed of AAE members and external experts.
