## **Stefan BREUNIG**

*Head of Strategy, Rolls Royce electrical*

### **Short bio**

Stefan is driving strategy definition and execution for Rolls-Royce's electrification efforts in new emerging markets like Urban and Regional Air Mobility. He joined the Rolls-Royce team in 2019 with the acquisition of Siemens eAircraft where he previously worked as innovation manager. He holds master's degree and PhD in engineering.

### **Abstract**

Rolls-Royce are championing electrification in aerospace, as a leading technology company we have a key role to play. We aim to offer world class modular and scalable electric power and propulsion systems for multiple uses. Electrification enables sustainable air transport and mobility, and Rolls-Royce are bringing together our unique expertise and capabilities to make this happen, delivering a full portfolio of power and propulsion systems and infrastructure. We are also tailoring data driven services for Advanced Air Mobility Stakeholders across the ecosystem, with value creation at part of the value chain.
